**Amendments to the Claims**:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1.-53. (Canceled).

54. (New) An education training system comprising:

a server for managing an education training course;

a terminal for a first manager which is connected to said server and which is operated by a first manager who manages said education training course;

a terminal for a trainee which is connected to said server and on which specified education training that is based on said education training course for a specified trainee is carried out by communicating with said server; and

a terminal for a second manager which is connected to said server and which is operated by a second manager who manages said specified education training for said specified trainee,

wherein said terminal for a second manager is capable of sending identification information showing an authority for managing said specified education training for said specified trainee to said server, and

wherein said server carries out management of said specified education training for said specified trainee based on an operation from said terminal for a second manager by receiving said identification information from said terminal for a second manager.

55. (New) The education training system according to claim 54, wherein the management of an education training course via said server includes management of time elapsed from when a trainee begins taking lectures of education training.

56.    (New)  The education training system according to claim 54, wherein the management of an education training course via said server includes analysis of comprehension of said trainee that is based on results of a test given to said trainee.

57.    (New)  The education training system according to claim 54, wherein the management of an education training course via said server includes an analysis of attractiveness of said education training course.

58.    (New)  The education training system according to claim 54, wherein an operation of said terminal for a first manager includes a review operation of lecture information, which is stored on said server, of a trainee who takes lectures of said education training course.

59.    (New)  The education training system according to claim 54, wherein an operation of said terminal for a first manager includes an input operation of change information of said education training course, and said terminal for a first manager sends inputted change information of said education training course to said server.

60.    (New)  The education training system according to claim 54, wherein an operation of said terminal for a second manager includes a review operation of lecture information, which is stored on said server, of said specified trainee.

61.    (New)  The education training system according to claim 54, wherein an operation of said terminal for a second manager includes a content change operation of said specified education training for said specified trainee.

62.    (New)  An education training method comprising:

managing an education training course on a server;

carrying out an operation for managing said education training course from a terminal for a first manager which is connected to said server;

carrying out specified education training that is based on said education training course for a specified trainee at a terminal for a trainee which is connected to said server by communicating with said server;

sending identification information showing an authority for managing said specified education training for said specified trainee from a terminal for a second manager which is connected to said server, and carrying out an operation for managing said specified education training for said specified trainee; and

carrying out management, on said server, of said specified education training for said specified trainee based on an operation from said terminal for a second manager by receiving said identification information from said terminal for a second manager.

63.    (New)  The method according to claim 62, wherein management of time elapsed from when a trainee begins taking lectures of education training is carried out as the management of the education training course via said server.

64.    (New)  The method according to claim 62, wherein a test given to said trainee and an analysis of comprehension of said trainee that is based on results of said test are carried out as the management of the education training course via said server.

65.    (New)  The method according to claim 62, wherein an analysis of attractiveness of said education training course is carried out as the management of the education training course via said server.

66.    (New)  The method according to claim 62, wherein a review of lecture information, which is stored on said server, of a trainee who takes lectures of said education training course is carried out by operating said terminal for a first manager.

67.　(New)　The method according to claim 62, wherein change information of said education training course is input at said terminal for a first manager, and

inputted change information of said education training course is sent to said server from said terminal for a first manager.

68.　(New)　The method according to claim 62, wherein lecture information, which is stored on said server, of said specified trainee is reviewed by operating said terminal for a second manager.

69.　(New)　The method according to claim 62, wherein content of said specified education training for said specified trainee is changed by operating said terminal for a second manager.

70.　(New)　A method for producing an education training system comprising:

providing a server for managing an education training course;

connecting a terminal for a first manager, which is operated by a first manager who manages said education training course, to said server;

connecting a terminal for a trainee, on which specified education training that is based on said education training course for a specified trainee is carried out by communicating with said server, to said server; and

connecting a terminal for a second manager, which is operated by a second manager who manages said specified education training for said specified trainee, to said server,

wherein said terminal for a second manager is constituted so as to send identification information showing an authority for managing said specified education training for said specified trainee to said server, and

wherein said server is constituted so as to carry out management of said specified education training for said specified trainee based on an operation from said terminal for a second manager by receiving said identification information from said terminal for a second manager.

71.    (New)  The method according to claim 70, wherein said server is constituted so as to manage time elapsed from when a trainee begins taking lectures of education training as the management of the education training course via said server.

72.    (New)  The method according to claim 70, wherein said sever is constituted so as to carry out analysis of comprehension of said trainee that is based on results of a test given to said trainee as the management of the education training course via said server.

73.    (New)  The method according to claim 70, wherein said server is constituted so as to carry out analysis of attractiveness of said education training course as the management of the education training course via said server.

74.    (New)  The method according to claim 70, wherein it is possible to review lecture information, which is stored on said server, of a trainee who takes lectures of said education training course from said terminal for a first manager as the management of said education training course by the operation of said terminal for a first manager.

75.    (New)  The method according to claim 70, comprising an input operation of change information of said education training course, and which is capable of sending inputted change information of said education training course to said server, as the management of said education training course by the operation of said terminal for a first manager.

76.    (New)  The method according to claim 70, wherein it is possible to review lecture information, which is stored on said server, of said specified trainee at said terminal for a second manager by operating said terminal for a second manager, as the management of said specified education training for said specified trainee by the operation of said terminal for a second manager.

77.    (New)  The method according to claim 70, wherein it is possible to change content of said specified education training for said specified trainee by operating said terminal for a second manager; as the management of said specified education training for said specified trainee by the operation of said terminal for a second manager.

78.    (New)  A server system for managing an education training course in which the following are connected together:

a terminal for a first manager operated by a first manager who manages said education training course;

a terminal for a trainee on which specified education training that is based on said education training course for a specified trainee is carried out by communicating with said server; and

a terminal for a second manager operated by a second manager who manages said specified education training for said specified trainee,

wherein said terminal for a second manager is capable of sending identification information showing an authority for managing said specified education training for said specified trainee to said server, and

said server system carries out management of said specified education training for said specified trainee based on an operation from said terminal for a

second manager by receiving said identification information from said terminal for a second manager.

79. (New) The server system according to claim 78, wherein time elapsed from when a trainee begins taking lectures of education training is managed as the management of the education training course.

80. (New) The server system according to claim 78, wherein an analysis of comprehension of said trainee that is based on results of a test given to said trainee is carried out as the management of the education training course.

81. (New) The server system according to claim 78, wherein an analysis of attractiveness of said education training course is carried out as the management of said education training course.

82. (New) A terminal for a trainee, which is used on an education training system that includes a server for managing an education training course, a terminal for a first manager which is connected to said server and which is operated by a first manager who manages said education training course, and a terminal for a second manager which is connected to said server and which is operated by a second manager who manages specified education training for a specified trainee, said terminal for a trainee being connected to said server and specified education training that is based on said education training course for a specified trainee being carried out on said terminal for a trainee by communicating with said server, wherein

said terminal for a second manager is capable of sending identification information showing an authority for managing said specified education training for said specified trainee to said server, and

said server carries out management of said specified education training for said specified trainee based on an operation from said terminal for a second

-8-

manager by receiving said identification information from said terminal for a second manager.

83.    (New)  The terminal for a trainee according to claim 82,

wherein a start time of when said trainee began taking lectures of said specified education training is sent to said server.

84.    (New)  The terminal for a trainee according to claim 82, wherein

received results of a test carried out during said specified education training are sent to said server.

85.    (New)  The terminal for a trainee according to claim 84, wherein

information relating to an analysis of comprehension that is based on results of said test is received from said server.

86.    (New)  The terminal for a trainee according to claim 82, wherein

information including information relating to a change of said education training course that is based on an operation of said terminal for a first manager or information relating to a change of said specified education training that is based on an operation from said terminal for a second manager is received from said server.

87.    (New)  A terminal for a second manager, which is used on an education training system that includes a server for managing an education training course, a terminal for a first manager which is connected to said server and which is operated by a first manager who manages said education training course, and a terminal for a trainee which is connected to said server and on which specified education training that is based on said education training course for a specified trainee is carried out by communicating with said server, said terminal for a second manager being connected to said server and being operated by a second manager who manages said specified education training for said specified trainee, wherein

said terminal for a second manager is capable of sending identification information showing an authorization for managing said specified education training for said specified trainee to said server, and

said server carries out management of said specified education training for said specified trainee based on an operation from said terminal for a second manager by receiving said identification information from said terminal for a second manager.

88.    (New)  The terminal for a second manager according to claim 87, wherein

information relating to lecture conditions of said specified education training for said specified trainee is received from said server.

89.    (New)  The terminal for a second manager according to claim 87, wherein

information relating to results of a test given to said specified trainee is received from said server as information relating to lecture conditions.

90.    (New)  The terminal for a second manager according to claim 87, wherein

information relating to a change in said education training course that is based on an operation of said terminal for a first manager is received as information relating lecture conditions.

91.    (New)  The terminal for a second manager according to claim 87, wherein

information for changing content of said specified education training for said specified trainee is input, and

said inputted information relating to a change of content of said specified education training is sent to said server.

92. (New) An education training system comprising:

a server for managing an education training course;

a terminal for a first manager which is connected to said server and which is operated by a first manager who manages said education training course; and

a terminal for a trainee which is connected to said server and on which specified education training that is based on said education training course for a specified trainee is carried out by communicating with said server, said terminal for a trainee sending information relating to a lecture history of said specified trainee to said server,

wherein said terminal for a first manager sends change information of said education training course input from said terminal for a first manager to said server, and

wherein said server changes content of said specified education training for said specified trainee based on change information of said education training course received from said terminal for a first manager and based on said information relating to a lecture history of said specified trainee received from said terminal for a trainee.

93. (New) An education training method comprising:

managing an education training course on a server;

carrying out an operation for managing said education training course from a terminal for a first manager which is connected to said server;

-11-

carrying out, on a terminal for a trainee which is connected to said server, specified education training that is based on said education training course for a specified trainee by communicating with said server and sending information relating to a lecture history of said specified trainee to said server;

sending change information, to said server, of said education training course to be input from said terminal for a first manager; and

changing content of said specified education training for said specified trainee based on said change information of said education training course received from said terminal for a first manager and based on said information relating to a lecture history of said specified trainee received from said terminal for a trainee.

94.    (New)  An education training system comprising:

a server for managing an education training course; and

a terminal for a trainee which is connected to said server and on which education training that is based on said education training course is carried out by communicating with said server, said terminal for a trainee sending test results carried out during said education training to said server,

wherein said server analyzes attractiveness of said education training based on said test results received from said terminal for a trainee.

95.    (New)  An education training method comprising:

managing an education training course on a server;

carrying out, on a terminal for a trainee which is connected to said server, education training that is based on said education training course by communicating with said server, and sending results of a test included in said education training to said server; and

analyzing attractiveness, on said server, of said education training based on said test results received from said terminal for a trainee.

96. (New) An education training system comprising:

a server for managing an education training course; and

a terminal for a trainee which is connected to said server and on which education training that is based on said education training course is carried out by communicating with said server,

wherein when a lecture period of said education training of said trainee exceeds a prescribed period, said server sends an extension notification indicating that said prescribed period has been exceeded to said terminal for a trainee.

97. (New) The system according to claim 96, wherein

said terminal for a trainee sends lecture start time information to said server when a lecture of said education training has begun,

said server manages an elapsed time from a lecture start of said education training based on said lecture start time information and sends said extension notification to said terminal for a trainee when said elapsed time from a lecture start exceeds said prescribed period.

98. (New) An education training method comprising:

managing an education training course on a server;

carrying out, on a terminal for a trainee which is connected to said server, education training that is based on said education training course by communicating with said server; and

when a lecture period of said education training of said trainee exceeds a prescribed period, sending an extension notification indicating that said prescribed time has been exceeded to said terminal for a trainee from said server.

99.    (New)  The method according to claim 98, wherein

lecture start time information is sent from said terminal for a trainee to

said server when a lecture of said education training has begun;

an elapsed time from a lecture start of said education training is

managed, on the server, based on said lecture start time information; and

said extension notification is sent to said terminal for a trainee when

said elapsed time from said lecture start has exceeded said prescribed time.
